- (a) Yes Sir.**
- (b) Ministry of Earth Sciences (MoES), Govt. of India has already established the Centre for Climate Change Research (CCCR) at the Indian Institute of Tropical Meteorology (IITM), Pune, since January 2009 to study the impact of climate change in the country. The centre is dedicated to carry out research on global and regional climate change with a particular focus on the Indian climate and the monsoons. CCCR has started the coupled climate modelling, and based on the efforts, an Indian Climate specific Earth System Model (ESM) has been developed which is contributing to the Intergovernmental Panel on Climate Change (IPCC) 6th Assessment (IPCC-AR6). Currently efforts are on going to generate the climate change scenarios. Also to better understand the regional climate change issues, CCCR has undertaken the Coordinated Downscaling Experiment (CORDEX)-South Asia Program. It is generating and collating from various partners, downscaled (regionalizing at high resolution) and latest climate projections from multiple models.**
